London Tap Water after being energised by the Universal Harmoniser

**ORDERING DETAILS:**

| Product                              | Price   | No. | Total |
|--------------------------------------|---------|-----|-------|
| <b>Stabilized Oxygen</b>             | £30.00  |     |       |
| <b>NEW Personal Water Enhancer</b>   | £40.00  |     |       |
| <b>Dr LaMar's Ionic Minerals</b>     | £26.00  |     |       |
| <b>U/Harmoniser -Space Clearing</b>  | £189.00 |     |       |
| <b>U/Harmoniser - Body Balancing</b> | £99.00  |     |       |
| Please add P & P (see below)         |         |     |       |
| Grand Total                          |         |     | £     |

Postage and Packaging: **Enhancers** – UK £2.50, Rest of World £8.00 per order. Oxygen 1 bottle UK £2.50, Rest of World £8.00

**Universal Harmonisers** – UK £6.00, Europe £10.00, Rest of World £15.00. 1 bottle Ionic Minerals, UK £3.50, Rest of World £10.00

Please make cheques payable to Equilibra. All major credit cards accepted. Please ring to place an order or for more information.

**ENERGY PRODUCTS  
 FOR IMPROVING  
 BIOPHYSICAL HEALTH**

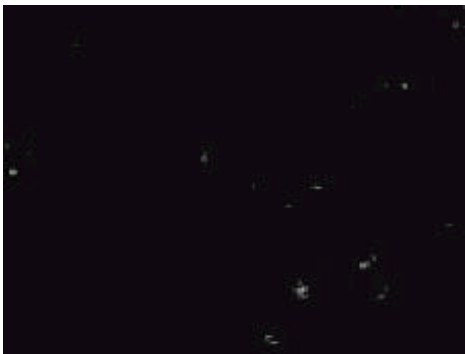

The information in this brochure is for educational purposes only and in no way signifies medical advice or is to be considered a substitute or replacement for medical advice or allopathic medicines

Providing our Energy Products remain undamaged in any way they  
 Will remain active for a lifetime of use

## HOW CAN THE QUALITY OF WATER DETERMINE YOUR HEALTH AND PHYSICAL WELL BEING?

One of the important properties of **Water** is its ability to store and share information, and in particular **photons**. Photons are particles of **light** (information) which are also found in the living cells of plants, animals or humans, and because they are found in what is referred to as biological systems, they are also known as **biophotons**.

As our cells hold between 75 – 90% water, our cells store and emit photons too, which control vital processes. **DNA** lies in the centre of every living cell coiled like a snake or a serpent, surrounded by water or intracellular fluid. Our DNA is composed of light and emits **photons** – particles of light (energy) - that contain instructions on how the cell should perform and replicate. The cell receives **information** from our DNA via the cell's watery environment, because water stores and shares information from **all** energy sources. This **inner light** (energy from our DNA), courtesy of our internal watery environment, gradually expands outwards from the cell towards our skin, finally extending from the body where it forms the **Auric or Biophysical Field** due to water molecules in the air around us. This is how our energy fields interact and communicate with everything around them. In addition, part of this inner light is utilised in our biochemical environment to provide a different form of energy: Adenosine Triphosphate (**ATP**), which governs our biological processes. ATP is a nucleotide molecule found in all cells and is used to drive the thousands of biological processes needed to sustain life, growth, movement and reproduction. ATP is the Universal energy-carrying molecule and is indispensable to the life of the physical cell.

The photograph on the left is of ordinary London tap water. We can see there is little photon activity, light or life force energy present - therefore, it is **'lifeless'**.

**Water** is replete in all things: the air we breathe, the food we eat and in all that we drink. The physical body holds

2. Whilst sitting and relaxing, place one Harmoniser under each foot. This stimulates the Zonal and Reflex Points of the feet as well as the meridians.
3. Holding a Harmoniser in each hand between the thumb and one finger, then by changing fingers we can clear and strengthen the meridians of the fingers helping to balance the whole body.
4. Place drinks and food on the Harmoniser before consuming to improve their vibrancy and energy value. In addition to increasing the levels of photons in food and drink, the Harmonisers helps to transmute imbalanced energies into a more balanced and harmonious state.
5. As the energy fields of the individual are amplified and strengthened, this naturally helps **therapists** in their healing work by enabling them to locate areas of blockage/damage more readily and discern when they have been cleared.
6. Place by the bedside during sleep to help balance the surrounding energies and likewise on the desk when working on the computer + a whole lot more.

## FOR SPACE CLEARING AND A DEEPER CLEANSING OF THE BODY

Four Harmonisers and four quartz crystal pyramids are provided. This is the **ultimate** in **Space Clearing**. Working through water molecules in the air, it is possible to keep the energies of our home and workplace vibrant and alive. A Harmoniser and crystal can be placed in each corner of a room or building to cleanse and balance the atmosphere in this way. See Testimonies.

Modern medicine treats the symptoms *rather* than the cause of an illness. Feng Shui and Space Clearing techniques are helpful, but are similar in the way they too treat the *symptoms* of imbalanced energies *rather* than the *cause*. Many forms of Space Clearing merely force imbalanced energies elsewhere, yet the Universal Harmonisers help to **'implode'** these energies, **transforming** them and then **'exploding'** purified energy back into the surrounding environment, just as Nature does to maintain equilibrium. As the expansion of purified energies works through resonance, the cleansing process improves over time. **See Testimonies**.

This **unique process reduces** the amount of imbalanced energies in the environment, and by producing a purer vibration in our living/work space, encourages spiritual growth and restoration of balance within the physical body.

In contrast to Schweitzer's work, the above photographs are of the **crystalline structure** of distilled water after being energised by the Universal Harmoniser.

**Masaru Emoto's** assistant, Dr Nemoto, carried out the testing of the Universal Harmoniser at the I.H.M. RESEARCH INSTITUTE in Japan, to see what effects they had on distilled water. Masaru Emoto has produced a book of the World's first pictures of the crystalline structure of frozen water and how our thoughts, prayers and even music can and do affect water in a beneficial or detrimental way. See separate information for more details on Masaru Emoto, the above photographs and how our products are put together.

The Universal Harmonisers are available in the following combinations with quartz crystal pyramids to amplify and complement their balancing energies.

### FOR BODY BALANCING & SELF HEALING

Two Harmonisers and two quartz crystal pyramids are provided. Suggested uses:

1. Lying down comfortably, place one Harmoniser + crystal over the Heart area and the other + crystal over the Navel area. This allows an individual with no 'healing' experience to simply and easily cleanse, balance and strengthen their Chakras and various energy fields of their body - from cellular level outwards, encompassing the biophysical/auric field without having to do anything else.

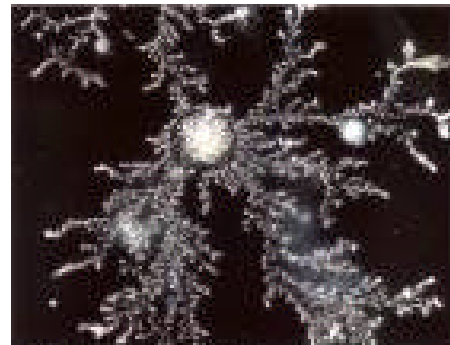

\* A chart detailing the major & minor chakras + simple instructions are provided, enabling a deeper, more profound cleansing & balancing of each individual chakra to be achieved. This facilitates the release of deep-seated emotional and mental blockages & the transmutation of any imbalanced energy thought form attachments present in our energy field, thus removing any detrimental influences they may have on our health.

some three gallons of water and approximately 70% of the Earth's surface is covered by water. We can see that our physical, mental and spiritual health is governed by the quality of water and the amount of photons (coherent light-energy) it contains.

Equilibra's Energy products have been **scientifically proven to increase the photon absorption capacity in water**, enhancing the **ATP** response in the body for healthier cells and longevity. Our energy products resonate this coherent life force energy into food, drinks, the atmosphere, and even directly into the energy fields of the body where it can be utilised by our biophysical and biochemical processes to enhance spiritual and physical well-being.

Each product is designed to work **as Nature works** – simply, but effectively and totally naturally. The science of biophysics has established that when the Defence Mechanism of the body becomes weakened - our Energy Field - we then become ill. Imbalances first start when our internal watery environment stores external corrupt information (energies) from man-made sources, such as EMF's, mobile phones and their transmission towers, other people's negative emotions, beliefs, thoughts and actions etc., including our own. If these energy imbalances or 'memory stores' are not corrected, then they will begin to distort or scramble the natural coherent light emitted from our DNA and the cell will eventually begin to behave and replicate in accordance with the *distorted* information it is being fed. The cell will become erratic, imbalanced and unhealthy. Eventually this process will manifest as an illness or disease in the physical body. Energy can only express itself in this physical reality through the properties of water.

### ENERGY PRODUCTS

The photograph to the left is of London tap water after being energised by the **PERSONAL ENHANCER**. We can see immediately the increase in photon activity radiating from the central ball of light compared with ordinary tap water. The life force energy in water has been greatly enhanced and this extra vitality can then be shared with us.

Water is a precious commodity. Unfortunately today, water contains toxins and pollutants of our own making. Even our drinking water is subjected to unnatural treatments with various chemicals, leaving residual energy imprints of these toxic substances behind in the waters 'memory banks'.

Using the Energy Products vastly improves the quality of the water you use by returning the life-sustaining properties of photons to its structure that are generally lost due to Man's interference with Nature. By using this naturally revitalised water in your everyday lives, you are not only likely to improve your own health, but are also helping and improving the environment around you.

By attaching the products to your various household water systems, you can ensure that you and all other living organisms benefit from highly energised and vibrant water. They can be applied to your main inlet water pipes, your holding tanks, your fridge freezers and very effectively to your central heating system by attaching them to the radiators, where highly charged life-force energy is then radiated into rooms and taken up by the water molecules in your living environment.

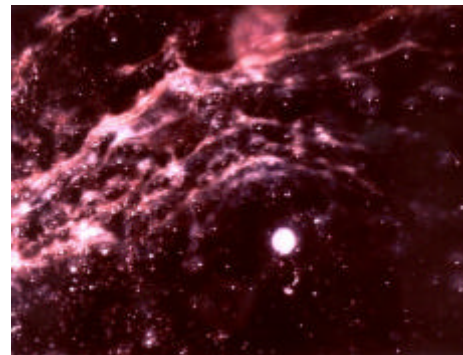

In the same way, you can place your drinks or your food upon the Energy Cards, to increase the life force energy within their respective water structures, thus revitalising and rebalancing everything before you consume it. Likewise, the energy potential of your nutritional products, Bach Flower Remedies, elixirs, essential oils, Stabilised Oxygen and even personal care products can also be enhanced and improved in this way.

By carrying the Energy Cards about your person, you are increasing your resilience against the man-made chaotic energies that are prevalent today. There are many effective uses: such as placing under the pillow or mattress at night – using to revitalise plants – floating a Card in the bath to energise the water for a more natural relaxing experience. This also helps to improve the quality (energy) of the wastewater released back into the system and the environment. For personal use, we not only increase the photon capacity within the human organism, but also encourage a considerable expansion of the EM Field (Aura) of the body, thereby improving and strengthening its defence or filtering mechanism, allowing the body to deal with and ground any external imbalanced energy and heal itself naturally.

This naturally helps the body to deal with man-made negative energies, such as harmful EMF's and microwave radiation from Mobile Phones and Masts. This process helps to decrease the debilitating effects these chaotic energies can have upon our physical and spiritual well-being.

**Which quality of water would you prefer to have in your body, drink, wash and bathe in, cook with and feed to your children, animals and plants?**

## THE UNIVERSAL HARMONISER

We can see a complete difference in this photograph and the one on the front page, compared with the previous photograph of energised water. The image to the left resembles both a super nova and also the cellular environment around the nucleus. It is an example of the macrocosm and the microcosm being a reflection of each other – **implosion and explosion**. The **cover image** (minus frame) is water energised

by the Harmoniser + crystal pyramid and we can see how the photons or light are continually expanded (multiplied) **uniformly**, bringing surrounding water molecules into a likewise balanced or **LIVING** state of existence.

The energies produced by the Universal Harmoniser **surpass** those of the Personal Enhancer and are of a much higher vibration, penetrating and working on a deeper level. They have, therefore, a more **qualitative** effect on water and **within** and **upon** the **human body** and its **energy fields**. The Universal Harmonisers epitomise the essence of Nature, working through the simple process of **implosion and explosion** to maintain perfect balance. The Universal Harmonisers can be used very effectively to balance and cleanse the **chakras** and the **auric field** and to **align** and **correct** the flow of energy from the **Assemblage Point – Sacred Heart** (in the centre of the Heart Chakra) **in a matter of minutes**.

\* The preceding photographs are taken by Prof. Schweitzer through a contrast darkfield microscope using a special tilting technique, polarizing filter and with an 820 NM light source enabling the micro cluster structure of water to be observed.
