

AtmosAir™ Solutions Air Purification Systems For Office Environments

Are You Interested in Happy & Highly Productive Employees?

AtmosAir™ Bi-Polar Ionization (BPI) systems can improve office productivity by creating a crisp, fresh and clean indoor environment. BPI eradicates dust particles, allergens, odors, mold, unhealthy VOCs, and reduces airborne and surface bacteria, viruses and germs.

AtmosAir™ Performance and Indoor Air Quality (IAQ) Benefits

- **Improves Office Indoor Air Quality and Interior Environment**
 - Less distracting odors and unhealthy & irritating VOCs
 - Suppresses airborne & surface pathogens (mold, viruses, bacteria, including H1N1, Staph and MRSA)
- **Outstanding response and relief for Allergy & Asthma Sufferers**
 - Knocks particulates out of the breathing range (dust, pollen, dander, allergens)
 - Deactivates airborne allergens, no symptoms occur even if they enter the body
- **Additional Value and Benefits**
 - Improved IAQ, which has been linked by studies to many health benefits
 - Increased productivity via reduction of absenteeism by as much as 35%
 - **AtmosAir™** should be part of an overall hygiene and corporate continuity strategy
 - Qualifies as a “green energy saving” product (Energy Star rated)
 - **AtmosAir™** can capture LEED credits
- **Applications: Offices, Fitness Centers, Cafeterias, Compactor rooms, Copier Rooms**
- **Customers include: UBS, Thomson , Cushman-Wakefield, Hyatt, Hilton, Carnegie Hall**
