

AtmosAir Solutions Air Purification Systems For Residential Properties

AtmosAir systems use nature's own cleaning method: Bi-Polar Ionization (negative and positive ions, or "activated oxygen clusters") interact with oppositely charged contaminants and reduce particulates, eliminate VOCs (Volatile Organic Compounds), odours and importantly reduce airborne bacteria, viruses and germs. Cost effective method to perceptibly freshen air that supports & benefits every biological system of the body – especially the Respiratory system

AtmosAir Potential Benefits

- Reduction of particles and spores which can trigger allergy and asthma symptoms
- Supports people with respiratory problems like COPD, Asthma, Bronchitis & more
- Proven reduction of Staphylococcus and Related MRSA and other microbials
- Continuous 24/7 use offers enhanced protection against mould, mildew, bacteria, allergies, germs, viruses, smoke, pet dander and more...
- Suppresses airborne & surface pathogens (mould, bacteria, viruses, including H1N1)
- Elimination of distracting odours & irritating VOCs from carpets, furniture and electronics
- Benefits animals and indoor plants too
- Improves: cellular energy & oxygenation, stamina, concentration & mental agility

Outstanding response and relief for Allergy & Asthma Sufferers & those with Respiratory Problems

- Knocks particulates out of the breathing range (dust, pollen, dander, allergens)
- Deactivates airborne allergens, no symptoms occur even if they enter the body
- Improves IAQ (Ionized Air Quality) which has been linked by studies to many health benefits
- Improved IAQ can help prevent particulates and spores that can trigger allergy & asthma symptoms, respiratory and otherwise

If you require health-promoting fresh highly ionized air - just like we find in the wide open spaces of Nature – or need protection from airborne pollution from the likes of Chemtrails, then look no further? We offer you the perfect solution you need with AtmosAir Bi-Polar Ionization portable units. Bipolar Air Ionization is also ideally suited for use in Offices (reduces absenteeism by up to 35% & helps reduce cross-infections from person to person), Waiting Rooms, Health Clinics & more

Please Contact Equibra for more information on Tel: +44 (0)1642 872610 – E-mail: equibra1010@gmail.com Or visit www.equibrauk.com and locate the page for Bipolar Ionizers from the dropdown menu at the top of each page.
